

FREE Online Skin Cancer CME for Eastern Shore Primary Care Clinicians!

Skin cancer is the most common cancer and Eastern Shore incidence and mortality rates are higher than Maryland rates. One American dies every hour from skin cancer. Clinicians in the primary care setting can play an important role in the early detection of skin cancer.

- Do you have confidence in your ability to recognize skin cancer?
- Do you know when to refer a patient to a dermatologist?

We are offering **4.5 Continuing Medical Education credits** for the course "Skin Cancer Education for Primary Care." This course is offered at no charge to Eastern Shore clinicians practicing in the primary care setting, including MDs, DOs, PAs, CRNPs, RNs, and CNMs.

This case-based skill-building course includes the following modules:

- ✓ The Early Recognition and Management of Melanoma
- ✓ Skin Cancer Prevention, including the effects of ultraviolet radiation, sun avoidance strategies and the appropriate use of sunscreens
- ✓ Differentiating Common Benign Lesions from Melanomas

For Registration Code, contact rherbst@medchi.org.

You will then visit www.vlh.com to register.

Coursework must be completed within 60 days of registration.

Hurry! Space is limited.

For questions contact Roberta Herbst, Director of Programs and Communication at the Center for a Healthy Maryland, at rherbst@medchi.org or 1.800.492.1056, extension 3340.

Supported by a grant from the Maryland Department of Health and Mental Hygiene
